

QS Test, omitted pairs: 4.7 %

H0 rejected (freq) on each edge, QS Test, Midpoint root

A phylogenetic tree with a root on the left. The root splits into two main branches. The upper branch leads to a node that splits into two tips: 'Heloderma_suspectum_ISIS100503' (top) and 'Xenosaurus_platycephalus_DQ990973' (bottom). The lower branch from the root leads to a single tip labeled 'Xenosaurus_platycephalus_DQ990973'.

Phylogenetic tree showing the relationships between *Agama agama*, *Uromastix acanthinura*, and *Leiolepis belliana*. The tree is rooted at the bottom left, with *Agama agama* at the top right, *Uromastix acanthinura* in the middle, and *Leiolepis belliana* at the bottom right.
